The Snail and the Whale

*This is the trail of the tiny snail, a silvery trail that looped and curled and said
"Lift wanted around the world".*

coral

seaweed

Sea creature facts

1. Dolphins sleep with half of their brain at a time so they are always aware of what is going on around them.
2. If a starfish loses a leg it can grow another new one.
3. Whales and dolphins do not breathe underwater like fish as they don't have gills. They breathe air into their lungs through a blowhole on top of their heads.
4. Turtles return to the beach where they hatched as a baby to lay their own eggs. This could be 30 years later!
