

Acropolis	An ancient citadel (fortress) usually on a hill. The Acropolis of Athens still stands.
Assembly	A group of citizens who turned up to vote.
Citizens	Inhabitants of a town or city.
Democracy	A form of government which was voted for by the citizens. Example: Athens
Oligarchy	A form of government ruled by a small group of people. Example: Sparta
Monarchy	A form of government ruled by a King. Example: Corinth
Olympics	An athletic event held every 4 years at Mount Olympus.
Myths	Titans A traditional story told of heroes or gods in Ancient Greece. The first
Architecture	Greek gods. The art or practise of designing and constructing
Philosophy	buildings. The study of the fundamental nature of knowledge, reality
	and existence.

Ancient Greece had no central government. People lived in **city-states** (called 'polis' in ancient Greece). At the centre of each city-state was a powerful city which ruled the area surrounding it. The city-states were often at war with one another, and occasionally teamed up against a common enemy. People were free to visit or even move to another city-state. At one point in history, it is estimated that there were over 1000 city-states. Some were very small, but others, like Athens and Sparta, were huge and powerful.

Greek vases tell us about what life was like in Greek cities. Some were decorated with scenes from daily life while others told myths.

CHRONOLOGY

Timeline	
2900 - 2000 BC	The Bronze Age when Early Aegean cultures start to emerge
2500 BC	The great Minoan civilisation
1200 BC	The Trojan War and the destruction of Troy
1050 - 750 BC	The Dark Ages of Greece
850 - 700 BC	Development of the first Greek Alphabet
776 BC	The First Olympic Games are staged
650 BC	The Rise of the Greek tyrants
600 BC	Greek Coin currency introduced
500 - 323 BC	The Greek Classical Period
490 BC	Greek/ Persian Wars led by Xerxes
333 BC	Alexander the Great defeats the Persians at Issus and is given Egypt by the Persian Satrap
86 BC	The Roman General Sulla captures Athens

Alexander The Great was King of ancient Macedonia for less than 13 years, he changed the course of history. One of the world's greatest military generals, he created a vast empire that stretched from Macedonia to Egypt and from Greece to part of India.

Tectonic plates borders

Earthquakes are caused when the earth's tectonic plates suddenly move. Most earthquakes occur near the tectonic plate boundaries. Earthquakes can cause lots of damage to roads, buildings and property.

How are volcanoes formed?

The structure of the earth

Earth's crust is made up of huge, rocky pieces called plates.

The plates move slowly over the crust. Most volcanoes lie along the boundaries between these plates. Volcanoes are made when pressure builds up inside the earth. This affects the earth's crust causing magma to sometimes erupt through it. Volcanoes have a long history of destruction. In 79 ce the eruption of Mount Vesuvius destroyed the Roman cities of Pompeii and Herculaneum.

What Comes Out of a Volcano?

Volcanoes don't just shoot out lava; they also release:

- Ash: Small, powdery pieces of rock and glass.
- Gas: Steam, sulfur compounds, and other gases.
- Volcanic Bombs: Large, flying pieces of hot rock

Greece is one of the world's most seismically active countries, which means earthquakes are a common occurrence. Greece is home to several volcanoes although most are dormant (they have erupted in the past but are unlikely to erupt again).

Around 50,000 earthquakes happen every year across the globe.

Phases of the Moon

The Moon does not produce its own light. We can see the Moon because it reflects light from the Sun. The Moon orbits the Earth, and as this happens the Moon's appearance when viewed from the Earth changes because different parts of the Moon are illuminated at different times. This means we see the Moon's phases from Earth as different shapes.

Day and night

As Earth orbits the Sun, it rotates on its axis. Each rotation of Earth on its axis takes 24 hours. This period of time is called a day. As Earth rotates on its axis, the side of Earth facing towards the Sun is lit by the Sun. People living on this side of the Earth experience day. The opposite side of Earth at this point is facing away from the Sun and people living on this side experience night.

Nicolaus Copernicus

Nicolaus Copernicus was an astronomer who changed how we viewed the positioning of the Sun, Earth and other celestial objects in space. He reasoned that it was the Sun at the middle of the known Universe and not the Earth, an idea that was strongly opposed at the time.

VOCABULARY

The Solar System

- Planets-** celestial body moving in an elliptical orbit round a star
- Celestial-** positioned in the sky, or outer space as observed in astronomy.
- Spherical-** shaped like a sphere.
- Solar System-** collection of eight planets and their moons in orbit around the sun, together with smaller bodies in the form of asteroids, meteoroids, and comets.
- Galaxy-** a system of millions or billions of stars, together with gas and dust, held together by gravitational attraction.
- Hemisphere-** half of the Earth, usually divided into Northern and Southern.
- Orbit-** curved path of celestial object or spacecraft round a star, planet or moon.
- Lunar-** determined by or resembling the moon.

VOCABULARY

Gravity- a force which pulls things towards the centre of the Earth. Discovered by Sir Isaac Newton.

Earth's gravitational pull- pull that Earth exerts on an object pulling it towards the Earth's centre.

Weight- The measure of the force of gravity on an object.

Mass- a measure of how much matter (stuff) is inside an object.

Air resistance- resistance or drag, acts against gravity on falling objects.

Water resistance- type of force that uses friction to slow things down that are moving through water.

Resistance- a force between surfaces that are touching.

Types of forces.

Levers, pulleys, gears and cogs.

Sir Isaac Newton (1643–1727) was a seminal English physicist, mathematician, and astronomer who revolutionized science. He developed the laws of motion and universal gravitation.

My **WEIGHT** on Earth is around 560N

My **WEIGHT** on the moon is around 90N

My **MASS** is always 56kg!!

The weight of an object is caused by gravity pulling down on it. Objects with more mass have a greater weight, as the force of gravity pulls them down more strongly.

Christianity is focussed on the life and teachings of **Jesus Christ**, who Christians believe to be the Son of God. Jesus was born in **Bethlehem** in the Middle East over 2,000 years ago.

What do Christians believe?

Christians believe there is only one God, but that he is revealed in three different forms:

The Bible describes God as a **Trinity**: one God existing in three distinct persons - Father,

Jesus taught his followers about the Kingdom of God, a spiritual realm ruled by God, and how to live righteous lives to be part of it. He emphasized loving God and loving one's neighbour as one-self. Jesus taught through parables, stories with moral lessons, and by demonstrating his teachings through action.

Key Teachings:

- **The Kingdom of God:** Jesus proclaimed the arrival of the Kingdom of God, a spiritual realm where God's will is done.
- **Love:** He taught that loving God and loving one's neighbour as oneself are the most important commandments.
- **Forgiveness:** Jesus emphasized the importance of forgiving others, even enemies.
- **Humility:** He encouraged his followers to be humble and serve others.

The Christian holy book is the Bible, and consists of the Old and New Testaments. The Bible is used by Christians to give them guidance about how they can live their lives in the way God would want them to. There is guidance in the Bible on

Blues music is often sad and emotional, which is why we say we have 'the blues' when we feel sad. Its main features are the 12-bar blues and the blues scale, which includes a lot of improvisation.

The Blues scale

The Blues scale to accompany our 12-bar Blues is made up of these notes:

chord	Two or more notes that are played at the same time and work in harmony.
scale	Any set of musical notes which are in order of their pitch.
ascending scale	A scale in which the pitch of the notes goes up.
descending scale	A scale in which the pitch of the notes goes down.
blues scale	A set of notes used to play a melody over a 12-bar blues.
improvisation	Making up music as it is played or performed.
bent notes	A musical note that varies in pitch usually going up slightly at the end.
bar	A section of music with a specific number of beats (in blues there are usually 4 beats in a bar).
quaver	A note which last for half a beat.

une souris

une tortue

un hamster

Narrative Writing

Handwriting must use the correct formation, should be cursive, even, correctly spaced and fluent. Writers can begin to develop their own style.

Writing a Play Script

Key	
Character names	Speech
Setting the scene	Character directions within speech
Stage directions	

**NO INVERTED
COMMAS
NEEDED**

The Mad Hatter, Dormouse and Hare are sitting at a table having afternoon tea.

Alice enters the scene, stage left.

Mad Hatter: *(starts for a moment, pauses and a broad grin appears across his face He gets up out of his chair and walks across the table towards Alice, It's you.*

Dormouse: *(exasperated) No it's not! Hare brought us the wrong Alice!*

Hare: *(gasps and throws his hands against his head) It's the wrong Alice!*

Mad Hatter: *You're absolutely Alice, I'd know you anywhere! (to the rest of the characters at the table) I'd know her anywhere!*

Dormouse and Hare laugh maniacally.

Well, as you can see we're still having tea. You're terribly late you know... naughty.

Alice: *I'm incredibly intrigued.*

Mad Hatter: *Yes yes of course, but now we must get onto the Frabjous Day!*

Dormouse & Hare together: **FRABJOUS DAY!!**

Mad Hatter: *We're investigating things that begin with the letter M. (whispers) Have you any idea why a raven is like a writing desk?*

Writing a Persuasive Text

- Titles implies a viewpoint
 - Reasons need to support viewpoint
 - Facts and evidence need to support reasons
 - Connectives are needed to link ideas (however, furthermore, in addition, therefore)
 - Persuasive devices are used (obviously, without doubt, it is clear, undoubtedly, there is no reason, there can be no question)
 - Powerful adjectives used for impact
 - Rhetorical questions used to make the reader think
 - Conclusion summarised the case and states a clear opinion
- Some persuasive texts such as adverts frequently use:

- Word repetition
- Word alliteration
- Emotional language
- Strong argument
- Bold, colourful, capitalised font

Your story should be written using the following techniques:

- Paragraphs: Vary connectives within paragraphs to build cohesion ; use change of place, time and action to link ideas across paragraphs.
- Use of time slips– both forward and backward
- Vocabulary and dialogue used to move the story on
- Managed shifts in formality
- Varied story openings: flash backs; dialogue between characters; straight into action; a question to the reader; description of character or setting - Build-up –development of suspense techniques
- Problem / Dilemma –may be more than one problem to be resolved
- Resolution –clear links with dilemma
- Ending –character could reflect on events,; morals or lessons; cliff hanger; look to the future; ask a question; relate back to start

Writing a Journalistic Report

- Use the past tense -The report is usually the near past (yesterday or last week)
- Use the third person
- Do not include your own opinions
- Include quotations from experts or people involved
- Use reported speech as well as direct speech
- Begin with a snappy eye catching headline
- The first paragraph is called the lead paragraph and is an overview of the whole article (who, what, when, why where and how)
- Final paragraph: summarises the story; looks to the future; asks a question
- Can include a photograph with a caption

Features of a Biography

Purpose:

To give an account of someone's life

Structure:

- Opening statement introduces the subject, and explains why he/she is known
- Significant events are ordered chronologically
- Closing statement explains how this person will be remembered, and sometimes gives the writer's opinion

Language Features:

- Refers to named individuals
- Contains dates linked to specific events
- Written in the past tense
- Can include direct and indirect speech and quotes from other sources
- Written in 3rd person
- Includes time connectives to link ideas
- Events are anecdotal in style (rather than lists of facts), and engage the reader

Year Five - Autumn Term English Spelling, Punctuation and Grammar

A SENTENCE must make sense. Re-organising sentences using clauses can create interest and effect

Rhetorical Questions

Have you ever thought about using a rhetorical questions? Did you know that they can hook the reader in? Were you aware of the fact that rhetorical questions don't actually need an answer?

Do you think that .. ?
Don't you think that .. ?
Isn't it time to .. ?
Have you ever thought about .. ?
Why not .. ?
Need a .. ?
Need to .. ?
Fancy ... ?
Fed up with ... ?
Bored by ... ?
Haven't you always longed for a .. ?
Thought about ... ?
Worried about ... ?

To add interest to your writing you can use:

Personification
Alliteration
Onomatopoeia
Metaphors
Similes

Accurate, basic PUNCTUATION is vital

Higher level Punctuation should be used whenever you can Colons- at the start of a list and to separate two independent clauses

Semi-colons- to separate phrases in a list and two independent clauses

Bullet points- at the start of each item in a list

Dashes- same as a colon but less formal

Hyphens- to avoid ambiguity between two words

Brackets- to add information

Parenthesis- brackets, commas and dashes

GRAMMAR TO USE AND LEARN

Direct Speech: "Time for bed," said Mum.

Reported Speech: Mum said that it was time for bed.

ACTIVE VOICE and PASSIVE VOICE

The **active voice** of a verb tells us that someone (or something) does the action in a sentence.

The **passive voice** of a verb tells us that someone (or something) has an action done to them.

James watered the flowers.		The flowers were watered by James.
Sarah finished the homework.		The homework was finished by Sarah.
The puppy chewed the shoe.		The shoe was chewed by the puppy.

Non-Standard English: They ain't got nothing.
Standard English: They haven't got anything.

Non-Standard English: I love the player what scored.
Standard English: I love the player who scored.

Non-Standard English: We was there yesterday.
Standard English: We were there yesterday.

Non-Standard English: Pass me them books!
Standard English: Pass me those books!

Non-Standard English: I played good.
Standard English: I played well.

SPELLINGS TO LEARN

Synonyms

are words that have the same meaning

large / big

Antonyms

are words that have opposite meaning

fast / slow

Modal verbs

Modal verbs change the meaning of other verbs. They can express:

	CERTAINTY	ABILITY
OBLIGATION	will would might may shall	can could
	should must ought	

prefix	examples
ad-	adapt, admit, advance
de-	deceive, deform, describe
im-/in-	impose, increase, inform
per-	perform, persuade, perceive
re-	recall, receive, reproduce

accommodate	category	determined	forty	marvellous	programme	soldier
accompany	cemetery	develop	frequently	mischievous	pronunciation	stomach

Vocabulary- Number

Prime numbers	A number that is divisible only by itself and 1 (e.g. 2, 3, 5, 7, 11).
Composite (non-prime) numbers	A composite number has more than two factors.

Long Multiplication

Multiplying by a Two-Digit Number

$$154 \times 26$$

1 Write the numbers above each other in the correct columns.

$$\begin{array}{r} 154 \\ \times 26 \\ \hline \end{array}$$

2 First, multiply the ones in the three-digit number by the ones in the two-digit number.

$$\begin{array}{r} 154 \\ \times 26 \\ \hline 4 \end{array}$$

$$4 \text{ ones} \times 6 \text{ ones} = 24 \text{ ones} = 2 \text{ tens and } 4 \text{ ones}$$

Write 4 in the answer section and regroup the 2 tens by writing 2 above the tens column.

3 Next, multiply the tens in the three-digit number by the ones digits in the two-digit number and add any regrouped tens.

$$5 \text{ tens} \times 6 = 30 \text{ tens} = 3 \text{ hundreds and } 2 \text{ tens}$$

Write 2 in the answer section and regroup the 3 hundreds by writing 3 above the hundreds column.

4 Finally, multiply the hundreds in the three-digit number by the ones digits in the two-digit number and add any regrouped hundreds.

$$1 \text{ hundred} \times 6 = 6 \text{ hundreds} + 3 \text{ hundreds} = 9 \text{ hundreds}$$

Write 9 in the answer section.

$$\begin{array}{r} 32 \\ \times 154 \\ \hline 24 \\ 1540 \\ 3200 \\ \hline 9244 \end{array}$$

Square Numbers

The product of a number multiplied by itself.

$$\text{e.g. } 10 \times 10 = 100$$

which can be shown as:

$$10^2 = 100$$

$$10 \text{ squared} = 100$$

$$10 \times 10 = 100$$

$$1^2 \quad 1 \times 1 = 1$$

$$2^2 \quad 2 \times 2 = 4$$

$$3^2 \quad 3 \times 3 = 9$$

$$4^2 \quad 4 \times 4 = 16$$

$$5^2 \quad 5 \times 5 = 25$$

$$6^2 \quad 6 \times 6 = 36$$

$$7^2 \quad 7 \times 7 = 49$$

$$8^2 \quad 8 \times 8 = 64$$

$$9^2 \quad 9 \times 9 = 81$$

$$10^2 \quad 10 \times 10 = 100$$

Prime Numbers

A natural number greater than 1 with no divisors other than 1 and itself.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Short Division

Dividing by a One-Digit Number

$$84 \div 6$$

1 Partition 84 into tens and ones.

Work out how many 6s divide into 80 so that the answer is a multiple of 10.

In this case, the highest multiple of 10 divisible by 6 is 60.

Partition 84 into 60 and 24 then divide each number by 6.

Combine the totals.

2 Combine the totals.

$$\begin{array}{r} 10 + 4 \\ 6 \overline{) 60 + 24} \\ \underline{60} \\ 24 \\ \underline{24} \\ 0 \end{array}$$

3 This can be shortened to:

$$\begin{array}{r} 14 \\ 6 \overline{) 84} \\ \underline{6} \\ 24 \\ \underline{24} \\ 0 \end{array}$$

Addition with 5-Digit Numbers: Column Method

$$\begin{array}{r} 32294 \\ + 34515 \\ \hline \end{array}$$

1 Place the numbers one on top of the other, lining up the digits correctly.

$$\begin{array}{r} 32294 \\ + 34515 \\ \hline 9 \end{array}$$

2 Add the ones and write the answer under the ones.

$$\begin{array}{r} 32294 \\ + 34515 \\ \hline 09 \end{array}$$

3 Add the tens and write the answer under the tens. Regroup any hundreds under the hundreds column.

$$\begin{array}{r} 32294 \\ + 34515 \\ \hline 809 \end{array}$$

4 Add the hundreds, including any thousands that you are carrying forward.

$$\begin{array}{r} 32294 \\ + 34515 \\ \hline 6809 \end{array}$$

5 Add the thousands and write the answer under the thousands.

$$\begin{array}{r} 32294 \\ + 34515 \\ \hline 66809 \end{array}$$

6 Add the tens thousands.

$$\begin{array}{r} 32294 \\ + 34515 \\ \hline 66809 \end{array}$$

7 Check your answer.

Rounding to decimal places

Rounding to decimal places is exactly like rounding whole numbers - you just have more numbers (and therefore greater accuracy).

3.248

3 is the units digit.

2 is worth 2 tenths, and is the first decimal place.

4 is worth 4 hundredths, and is the second decimal place.

8 is worth 8 thousandths, and is the third decimal place.

You will sometimes see "decimal place" shortened to "d.p."

3.248 rounded to 1 d.p.

3.248 → 3.2

1st dp 3.2

Look at the next digit. 4 stays down - stay at 3.2.

3.248 rounded to 2 d.p.

3.248 → 3.25

2nd dp 3.24

Look at the next digit. 8 rounds up - go to 3.25.

Subtraction: 5-Digit Column Method

1 38291 - 18636

2 38291 - 18636

3 38291 - 18636

4 38291 - 18636

5 38291 - 18636

6 38291 - 18636

Vocabulary- Measurement

Perimeter	The continuous line forming the boundary of a closed geometrical figure.
Area	The extent or measurement of a surface or piece of land.
Volume	The amount of space that a substance or object occupies, or that is enclosed within a container.

Vocabulary- Angles

Degrees	a unit of measurement of angles
Obtuse angle	An angle whose measure is greater than 90° and less than 180°
Reflex angle	Reflex angles are angles measuring greater than 180° and less than 360°
Acute angle	An acute angle ("acute" meaning "small") is an angle smaller than a right angle. The range of an acute angle is between 0 and 90°

Cube Numbers

Formed by multiplying a digit by itself 3 times.

e.g. $10 \times 10 \times 10 = 1000$

$$10^3 = 1000$$

$$10 \text{ cubed} = 1000$$

$$10 \times 10 \times 10 \text{ cube}$$

1 ³	1 x 1 x 1 = 1
2 ³	2 x 2 x 2 = 8
3 ³	3 x 3 x 3 = 27
4 ³	4 x 4 x 4 = 64
5 ³	5 x 5 x 5 = 125
6 ³	6 x 6 x 6 = 216
7 ³	7 x 7 x 7 = 343
8 ³	8 x 8 x 8 = 512
9 ³	9 x 9 x 9 = 729
10 ³	10 x 10 x 10 = 1000

Vocabulary- Fractions

Equivalent fractions	Equivalent fractions can be defined as fractions with different numerators and denominators that represent the same value or proportion of the whole.
Improper fractions	A fraction in which the numerator is greater than the denominator, such as 5/4.
Mixed fractions	A whole number and a fraction combined into one "mixed" number/mixed fractions. Example: 1½ (one and a half) is a mixed fraction.
